Ecommerce & Performance Marketing

Commerce operations, paid acquisition and the economics behind profitable growth.

+ Proposed additions or explicit detail

Variables, KPIs, levers and objects

01 ECOMMERCE

Source pp. 4-6

Models	DTC; B2C; B2B; marketplace; subscription; omnichannel; wholesale.
Catalogue	Product; SKU; variant; category; collection; taxonomy; attributes; GTIN; brand; title; description; images; video; specifications; reviews.
Price & offer	Base / sale / regional / dynamic price; markdown; coupons; discounts; bundles; gifts; thresholds; free shipping; value proposition.
Merchandising	Ranking; featured products; cross-sell; upsell; recommendations; behavioural / segment offers.
Discovery & PDP	Navigation; search; autocomplete; filters; category / collection pages; PDP content; availability; delivery promise; CTA; SEO architecture / indexation / content / structured data; AI discovery.
Experience	Mobile UX / performance; accessibility; hierarchy; trust; page speed; uptime; errors.
Cart & checkout	Cart value / items / quantity; upsells; discount application; initiation; steps; friction; address; delivery; payment methods / authorization / decline and failure rates / fees / fraud.
Order & stock	Order creation / status / cancellation rate / modification; stock; safety stock; stockout rate; overstock; availability; inventory turnover.
Fulfilment	Warehouse; pick-pack; fulfilment time / cost; shipment / carrier; shipping cost / subsidy / region; delivery SLA / success / on-time rate.
After purchase	Return rate / reason / reverse logistics cost; refund rate / value / timing / reason; support contacts / tickets; resolution time; cost / contact; satisfaction / NPS / CSAT; UGC volume / rating / feedback.
Operations	Language; currency; tax; duties; listings; marketplace fees; stock sync; price parity; product feeds; apps / extensions; technical debt; integrations; security; event schema / IDs / funnel tracking.
Recurring & loyalty	Recurring orders; renewal; pause; cancellation; churn; points; tiers; reward cost / redemption; repeat behaviour.
Funnel KPIs	Users; sessions; product views; search usage; add-to-cart rate; cart abandonment; checkout start / completion; CVR; orders; units / order.
Value & cost KPIs	Revenue / visitor / customer; repeat purchase; revenue- vs contribution-LTV; gross / contribution / operating margin; fulfilment / payment / shipping / return / service cost per order. Sales, AOV and costs: see 04 / T1.
+ Commerce detail	Search zero-result rate; feed rejection rate; sell-through; inventory days; forecast error; supplier lead time; chargeback rate; recovered-payment rate. B2B: quote-to-order; minimum order; account price; payment terms.

04 PERFORMANCE MARKETING

Source pp. 10-13

Campaign	Channel / platform / account; campaign / objective; audience; geo; device; placement; creative; offer; product / SKU; landing page; budget / spend / bid / strategy; conversion objective / value; attribution; dates; owner; experiment; revenue / margin / incremental outcome.
Delivery to value	Impressions; reach; frequency; CPM; clicks; CTR; CPC; landing-page views; engaged sessions; product views; add-to-cart; checkout; leads; purchases; CVR; CPA; new customers; CAC; revenue; AOV; ROAS; contribution / ad spend.
Measurement	Paid / channel / blended / fully loaded CAC; total marketing efficiency; incremental conversions / revenue / profit; iROAS; attribution model / window; cross-channel overlap; lift / holdout; MMM; response curve; saturation; marginal ROI; profit-based budget allocation.
+ Optimisation detail	Budget pacing; creative fatigue; impression share; conversion lag; qualified / offline conversion import; new vs existing customer mix; marginal CAC; MER with defined cost scope.

T1 ECONOMICS & BUSINESS

Shared by all six domains

Economics	Gross / net sales; revenue; discounts; COGS; gross / contribution / operating profit; marketing / technology / labour / operating costs; budget; cash; incremental outcome; cost savings; revenue / profit lift; ROI.
+ Decision economics	Net sales excluding tax / refunds; contribution before / after media; contribution-LTV:CAC; CAC payback; break-even CAC / ROAS; working capital; cash conversion cycle; realised savings vs released capacity.
+ Decision context	Seasonality; price elasticity; competitor price; channel / customer concentration; upside / downside scenarios; decision horizon.

ROI = (incremental contribution before programme costs + verified savings - programme costs) / programme costs.

Use the same period/currency and incremental programme costs > 0. Count each saving/cost once; ROAS and MER are not ROI.

Digital Marketing & Digital Growth

Demand, customer lifecycle, experiments and the people who operate the system.

+ Proposed additions or explicit detail

Variables, KPIs, levers and objects

02 DIGITAL MARKETING & CRM

Source pp. 6-9

Search & content	Technical SEO; crawl / indexation; architecture; intent / keywords; content; internal links; authority; AI search / product / brand / entity visibility; articles / guides / video / assets / lead magnets / education.
Channels	Organic social; community; advocacy; digital PR / mentions / links; paid search; Shopping / PMax; paid social; display / native / programmatic; retargeting / prospecting; video / CTV; retail media; influencers / creators; affiliates / coupons / comparisons / commissions; referral; partnerships / co-marketing / integrations.
Direct & commerce	Email; SMS; WhatsApp / messaging; web / app push; in-app; CRM; personalisation; loyalty; marketplaces; app acquisition / store optimisation; local SEO / store traffic; offline-to-online / QR / events / retail / direct mail.
Marketing objects	Channel; source; medium; campaign; ad group; ad; creative; keyword; audience; placement; influencer; affiliate; content.
Customer profile	Identity; acquisition source; preferences; consent; browsing / campaign / click / product / cart / order / return history; revenue; predicted value; segment; journey; message; lifecycle stage.
Lifecycle	Anonymous / known visitor; lead / subscriber; prospect; first / repeat / high-value / loyal customer; advocate; at-risk; lapsed; reactivated.
Journeys	Welcome; onboarding; browse / cart / checkout abandonment; post-purchase; review request; cross-sell; upsell; replenishment; loyalty; birthday / anniversary; VIP; price drop; back-in-stock; churn prevention; win-back; reactivation.
CRM KPIs	Sends; delivery / bounce / click / unsubscribe / complaint rates; conversions; orders; attributed revenue; revenue / recipient; order rate.
+ B2B & lead generation	Target account; buying committee; lead fit / intent / score; MQL; SQL; opportunity; pipeline value; stage conversion; lead response time; win rate; deal value; sales cycle; sales velocity; cost / qualified lead; cost / opportunity; booked-call / show rate.
+ Channel quality	Brand vs non-brand demand; share of search; qualified organic visits; AI-referral conversions; inbox placement; sender reputation; contactability; message pressure / fatigue.

03 DIGITAL GROWTH

Source pp. 8-10

Stages & levers	Market; acquisition; activation; engagement; conversion; retention; repeat; expansion; referral; reactivation. Targeting / mix; first value; offer / UX / trust / price / checkout / CRO; product use; service / quality; reminders; premium / bundle; incentives / sharing.
Cohorts	Acquisition month / channel / campaign; new / returning customers; cohort revenue / retention; repeat rate; LTV.
Experiments	ID; objective; hypothesis; owner; funnel stage; audience; control; variants; traffic split; primary / secondary / guardrail KPI; start / end; sample; lift; incremental value; uncertainty; cost; decision; learning; follow-up.
+ Growth detail	Activation rate; time to first value; purchase frequency; interpurchase time; referral conversion / cycle; growth-loop yield; impact / confidence / effort / time to value.
+ Test design	Minimum detectable effect; statistical power; randomisation unit; sample-ratio mismatch; stopping rule; novelty / seasonality effects.
+ Recurring models only	Trial-to-paid; MRR / ARR; ARPU; expansion / contraction revenue; gross / net revenue retention; voluntary / involuntary churn; dunning recovery.
+ Service/booking models only	Lead-to-booking; capacity utilisation; cancellation / no-show; contribution per service / booking.

T3 PEOPLE, DELIVERY & GOVERNANCE

Source pp. 20-25

Delivery	Team / person / role / department; responsibility / skill / capacity / cost; project / initiative / task / milestone; owner / priority / status / dependency; SOP; workflow; approval; insight / recommendation / decision / action.
Governance	Consent; legal basis; purpose; data owner / retention; permissions; authentication; encryption; vendor / processor; audit log; incident / risk; policy; privacy / security / compliance; human oversight; AI literacy.
+ Execution	Available hours; adoption rate; training time; implementation maturity; release owner; rollback plan; review date; deletion propagation; least-privilege scope.

Select variables for the business model. Subscription, service and booking metrics apply only when relevant.

Grouped inventory: shared terms are consolidated; definitions and examples remain in the original 29-page research.

Agentic AI & Automations

Agent design, repeatable processes, reliable data and connected systems.

+ Proposed additions or explicit detail

Variables, KPIs, levers and objects

05 AGENTIC AI	Source pp. 13-15
Agent specification	Agent / role; business purpose; instructions / policies / SOP; model; knowledge source; campaign / customer / project context; memory / state / history; tools / APIs; read / write / action permissions; manual / event / schedule trigger; planning; handoffs; structured-output schema.
Control	Guardrails; human approval; fallback / escalation; traces / logs; evaluation; token / API / tool cost; latency; operational / reputational / privacy risk.
Agent catalogue	Ecommerce analyst; catalog; merchandising; pricing; SEO; content; creative intelligence; performance analyst; budget allocation; CRM; retention; CRO; experimentation; customer insight; competitor intelligence; reporting; forecasting; inventory; operations; ROI.
Agent KPIs	Task success; accuracy; human acceptance / override; error / false-action rate; completion time; time saved; cost / task; API / token cost; escalation; influenced / incremental revenue; cost savings; quality gain; ROI.
+ Reliability & control	Model / prompt / tool version; evaluation set; regression rate; repeat-run consistency; groundedness; retrieval freshness; tool-call success; verified outcome; cost / successful task; review / rework time; prompt-injection resistance; action / spend limits; stop conditions.

06 AUTOMATIONS	Source pp. 15-17, 25
Workflow	ID; trigger / source; conditions; data retrieval / transformation; action / destination / secondary action; integration / API; approval; validation; logging; queue; error; retry / escalation; owner.
Operations	Lead routing; CRM updates; audience sync; email / SMS triggers; cart recovery; segmentation; feed sync; price updates; stock alerts; campaign reporting; budget alerts; anomalies; UTM governance; dashboard refresh; review requests; support routing; refunds; order notifications; content distribution; SEO / competitor monitoring; experiment reporting; creative tagging; invoice / cost ingestion; ROI calculation; agent triggers; approvals.
Automation KPIs	Runs; success rate; manual / automated task time; cost / run; time saved; financial benefit; build / tools / AI / maintenance costs; labour / error savings; revenue uplift; capacity value; ROI.
+ Reliability	Webhook signature; idempotency key; duplicate-action rate; retry backoff; timeout; rate limits; failed-event queue / replay; queue age; end-to-end completion; recovery time; rollback; workflow version; test coverage.
+ Economic proof	Eligible volume; automation coverage; exception / rework rate; human review cost; verified hours / cash saved; realised capacity use; contribution uplift; monitoring / support cost.

T2 CONTEXT, DATA & STACK	Source pp. 3, 18-25
Business context	Company; business unit; brand; model; objective; market / country; demand; competition; customer needs / behaviour; ICP; persona; segment; audience; anonymous user; lifecycle stage; cohort.
Records & systems	Data source; event; metric / KPI; dimension; dashboard; report; pipeline; quality issue. Platform / tool / system; API / integration; database / warehouse; CRM / CDP / PIM / ERP / OMS / WMS; payments; analytics; SEO; support; finance; experiments; surveys; agent traces; workflow logs.
Join keys	IDs: company, project, customer, anonymous user, session, order, transaction, product, SKU, campaign, ad set, ad, creative, click, journey, experiment, automation, agent, task, cost; source / medium / campaign; UTM taxonomy.
KPI contract	Name; definition; formula; owner; source; scope; dimensions; frequency; currency; attribution model / window; baseline; target; actual; confidence; objective. Types: outcome, driver, efficiency, diagnostic, guardrail, quality / risk.
+ Reliability	Source of truth; order / refund / finance reconciliation; event deduplication; completeness; freshness; schema / version; identity match rate; consent coverage; observed vs modelled data; lineage; timezone; unit; metric grain.
+ Delivery stack	API limits; connector health; sync latency; license utilisation; total ownership cost; portability / vendor dependency; sandbox-to-production release.

Validate outcomes, costs and human review. Released capacity becomes financial value only when actually used or saved.

Source: supplied ROI model; extensions informed by Salesforce, Stripe, Google Analytics and Anthropic documentation.
